

Degree and Certificate SLO mapping

(eLUMEN PSLO mapping)

Goals:

- We need to verify that the degree and certificate SLOs (PSLOs) in eLUMEN are accurate and if they are not, flag them for Tom/Cari to fix. To do this, we are going to check them against the database that populated eLUMEN
- We need to figure out how out-of-date the 2012 mapping for these degrees/certificates is (ideally they are current and we can use them to map the degree/certificate SLOs right away!

How to do this:

-Go to the attachment Cara sent you 3/10 called “PSLOs from the old database” and “CSLOs from the old database.” This is the master list of all the degrees with accurate PSLOs and all course SLOs to check everything against in the steps below.

-Check the accuracy of PSLOs on the SLO side of eLUMEN. To do this, make sure your role is “**department coordinator.**” Then select “SLOs and Assessments,” then “PSLOs,” then “Curriculum Maps.” Check to see if the PSLOs are there (note that they may not be visible if they fall outside your area, and there are some other ongoing issues w/ access). . **Report this on the spreadsheet below.**

-Check the accuracy of PSLOs on the Curriculum side of eLUMEN. Go to the “Curriculum Tab,” then to the “Curriculum Library” tab, and then to the “Program” tab to the right of the “Course” tab. Search for the degree you are looking for. Click on that degree and then click on “View POR Report.”

- Once you get to the POR Report, skim through the POR and make sure that it is not glaringly blank in many sections, meaning that the info was not carried over from the old database. Make note on the spreadsheet below if it needs obvious revision.
- Then check the PSLOs at the bottom of the POR Report. Do they match the PSLOs in the old database? Make note if there are any missing on eLUMEN or the formatting isn't correct (like they are scrunched together or there's language missing).

-Check how accurate the 2012 mapping is for this degree/certificate. Go the CSLO to PSLO maps that were done in 2012 on our SLO website ([called instructional matrices](http://slo.marin.edu/instructional-slos-matrix)). Website is: <http://slo.marin.edu/instructional-slos-matrix>. Note that these also have CSLO to

ISLO maps that we don't need to deal with at this point. You'll see the PSLOs listed on p.3 to check, and you'll see them also listed under instructions called "THESE DEGREE OUTCOMES EQUAL WHICH COURSE OUTCOMES FOR THESE COURSES?".

Answer Question #3 on spreadsheet for the questions below.

- Are the PSLOs accurate, compared to the real PSLOs listed on the old database? Are the *individual* CSLOs mapped to the *individual* PSLOs? Are these the most current CSLOs for the courses (compared to the CSLOs listed on the old database)?

Division	Degree/Certificate	<p>1) On the SLO/Assessment side of eLUMEN, can you view the PSLOs? Are they accurate?</p> <p>2) When on the Curriculum tab of eLUMEN running the Program of Record, are the PSLOs on eLUMEN POR accurate? Also make a note if overall POR report appears to be missing A LOT of text</p> <p>3) Is the map (matrix) accurate from 2012 or does it need updating?</p>
Cara	AA-COM Communication, Filmmaking	<p>1) These aren't available</p> <p>2) PSLOs are NOT accurate. There is text missing across these two SLOs (copied from old database here): "Identify the primary influences of dominant mass media on major cultural practices and social formations" and "Recognize the influences of mass media on the construction of socio-cultural identity and behavior, in particular as they relate to the representations of race, class, and gender." Please fix.</p> <p>3) The matrix PSLOs are accurate but the courses w/ SLOs that match are not listed on the old database COR (titles may have changed from COMM to Film, but CSLOs are mapped to PSLOs on matrix – yay!).</p>
