

SLOAC Members present: Marian Russell, Yashica Crawford, Nancy Willet, Cesar Pumajulca and Farhad Zabihi

SLOAC Members absent: Sandy Boyd, Cara Kreit and Dan Zaffran

Minutes and agenda

Updates:

CORs and eLumen cleanup: SLOAC's role

- SLOAC members agree it is not in our line of work to do cleanup of CORs without proper training.
- We are responsible for SLOs and can check objectives but we are not checking beyond this
- Questions about the process of approving SLOs was asked, Logan will provide directions for SLOAC on how to approve SLOs

ELUMEN updates:

- will review how to score an assessment in the next computer lab
- reviewed the roll out process, how many assessment have been built and when faculty will get notifications
 - 150 assessments to date have been built and distributed
 - faculty will get the notification in their COM email in the next few weeks as they are built
 - reflection template tied to assessments, will not require additional sign in to complete
 - 6/7 is due date for all scoring
- still waiting for assessment schedules in life / earth sciences, we have until the end of the first week before we send out to all courses as our default
- reviewed Skyline's process and it was agreed we have a similar process already in place, could use step instructions for faculty
- Marian will update the video, Logan will send her an assessment to view
